QUALITY MANAGER in Fort Wainwright

The Quality Manager supervises the Quality Control staff responsible for the overall quality control program and quality assurances. The Quality Manager ensures that products or services the Logistics Readiness Center (LRC) provides are fit for their purpose, consistent and meet both external and internal requirements of the Performance Work Statement (PWS). This includes legal compliance and customer expectations. The Quality Manager develops and maintains a performance matrix that supports the Project's Quality Management System (QMS). The Quality Manager ensures surveillance inspections are performed and results measured against QMS standards. Assists branch managers and supervisors in developing processes that improve work performance.

Essential functions:

- The Quality Manager oversees all Quality Evaluators and oversees quality at the project level
- Direct and coordinate quality assurance programs/plans and Quality Assurance Surveillance Plan
- Coordinate with activities to ensure they meet the required quality standards listed in the PWS
- Conduct research and analysis of problems to determine if problems are human error or systemic
- Investigate and report injuries and incidents involving employees and damage to property
- Conduct Root Cause Analysis of Incident/Accidents of various programs
- Implement ISO 9001 Quality Management Systems standards.
- Implement and enforce OSHA, NFPA, EPA and DOD Safety standards and regulations
- Develop flowcharts to support process development, improvement
- Develop and update audit checklist prior to conducting audits/inspections. Prepares briefings on quality audit findings
- Monitor functional area internal inspection programs through analysis of their monthly reports
- Prepare audit/inspection reports; evaluate responses and performs follow-up actions
- Conduct activity, technical, and special inspections
- Conduct statistical and trend line analysis to support process improvement
- Participate and facilitate, as required, in process improvement meetings
- Develop programs as requested by the Project Manager to enhance operations
- Provides management reports relating to the quality control program
- Performs other relevant duties as assigned

Benefits:

- 401(k)
- Dental insurance
- Health insurance
- Paid time off
- Vision insurance
